Professional Summary

Full-Stack Developer with 5+ years of experience building enterprise systems, focused on C#, .NET and Angular. Experience with an ERP and payment integrations (Pix, Brazil's instant payment system, and cards), a franchise management system, and the project management system of SESC National Department, a nationwide Brazilian social services organization.

Applies DDD, Clean Architecture and SOLID, and works with messaging (RabbitMQ and Azure Service Bus), AWS and Azure DevOps. Experienced in architecture decisions, defining build and deployment (CI/CD) processes, and technical mentoring through code review. Proposed a refactoring that cut report generation time from up to 4 minutes to about 15 seconds. English: C2 (EF SET).

Professional Experience

Mid-level Full-Stack Developer
ED Soluções em Tecnologia | Assigned to SESC National Department
07/2025 – Present

Project management system used by SESC operation centers across Brazil (31 centers, about 200 users).

- Develops modules in .NET 8 and Angular 16: data extraction, project production tracking, cost center import and reporting.
- Took part in an asynchronous file processing solution with Azure Service Bus, working on parts of the implementation and the related infrastructure.
- Handles deployments through Azure DevOps pipelines.
- **Technologies:** .NET 8, C#, Angular 16, TypeScript, SQL Server, Azure DevOps, Azure Service Bus, event-driven architecture, Git.

Mid-level Full-Stack Developer
WLE Soluções em Software
12/2021 – 06/2025

- Developed modules of an ERP for small businesses (inventory, tax, finance and accounting) in .NET and Angular, serving about 400 clients and a network of about 80 franchises.
- Built the ERP payment integrations with Pix and cards, using Stone, Cielo and Vero.
- Created a checkout API in Node.js (Express), running in production and used in the ERP payment flows.
- Developed a franchisor's proprietary CRM, used to manage its franchise network, and proposed its refactoring using DDD and Clean Architecture. After the refactoring, some reports that took up to 4 minutes were generated in about 15 seconds.
- Had autonomy over architecture decisions and defined the build, validation and deployment process.
- Built a real-time delivery tracking platform with WebSockets, Node.js and Python (Flask).
- Integrated services asynchronously with RabbitMQ and used AWS (EC2, S3, RDS, Route 53 and CodeBuild).
- Mentored team developers through code review, business rule guidance and day-to-day support.
- **Technologies:** C#, .NET Framework, .NET Core, .NET, Entity Framework, Angular, TypeScript, Node.js (Express), Python (Flask), PostgreSQL, MongoDB, RabbitMQ, event-driven architecture, AWS, Git, GitHub.

Junior Full-Stack Developer
Pro4ce – Profource Tecnologias
12/2020 – 12/2021

- Developed modules of an ERP for e-commerce businesses (inventory, tax, finance and accounting), integrated with Brazilian marketplaces such as Mercado Livre, Magazine Luiza, B2W and Via Varejo.
- Applied CQRS in the ERP within an MVC architecture.

- Wrote tests with JUnit and automated build and deployment with Jenkins.
- Fixed and improved production features and supported ERP users.
- **Technologies:** Angular, TypeScript, Java EE, Spring Boot, PostgreSQL, Firebird, AWS (EC2, S3), GitLab, Jenkins, JUnit.

Technical Skills

- **Back-end:** C#, .NET 5+, .NET Core, .NET Framework, Entity Framework, RESTful APIs, Node.js (Express), Python (Flask), Java (Spring Boot).
- **Front-end:** Angular (since v6, including standalone components and Signals), TypeScript, JavaScript, HTML, CSS, responsive interfaces.
- **Architecture:** DDD, Clean Architecture, CQRS, microservices, event-driven architecture, MVC, OOP, SOLID, Clean Code.
- **Messaging:** RabbitMQ, Azure Service Bus.
- **Databases:** SQL Server, PostgreSQL, MongoDB, Firebird.
- **Cloud & DevOps:** AWS (EC2, S3, RDS, Route 53, CodeBuild), Azure DevOps, Docker, Docker Compose, CI/CD (Azure DevOps, Jenkins, GitLab), Git, GitHub, Linux.
- **Testing:** unit and integration testing, Coverlet (.NET coverage), Angular coverage tools.
- **AI-assisted development:** Claude Code.
- **Methodologies:** Scrum, Kanban, SAFe, XP.
- **Personal projects:** xUnit, GitHub Actions, Kubernetes, Rancher, Grafana, n8n with LLMs.

Education

- **Postgraduate Specialization in Full-Stack Development** | Descomplica Faculdade Digital | 2023 – 2024
- **Bachelor's Degree in Software Engineering** | Centro Universitário UGV, União da Vitória, PR, Brazil | 2019 – 2022 | Thesis on web accessibility

Languages

- Portuguese: Native
- English: Fluent (C2 – EF SET English Certificate, 80/100)
- Spanish: Limited working proficiency

Courses and Certifications

- EF SET English Certificate – C2 (80/100)
- Amazon Web Services training (course)

Personal Projects

- **pg-utils:** library of SQL/PLpgSQL functions, triggers and helpers for PostgreSQL (Brazilian tax ID validation, business days, JSONB, auditing), with tests and CI from PostgreSQL 14 to 18. https://github.com/gabrielf-agostinho/pg-utils
- **Codec:** browser-to-browser audio and video calls with WebRTC and PeerJS, built in Angular. https://github.com/gabrielf-agostinho/codec-v2
- **Você Trabalha Para Isso:** website with personal finance calculators for Brazilian workers (salary, contractor income, vacation pay, severance and more). https://vocetrabalhaparaisso.com.br
